Objective: To obtain a position as a Graduate Software Developer, utilizing my knowledge of various programming languages, my experience in investment analysis, and my passion for technology.
--

Education:

- Masters in Investment Analysis, [University of Stirling], [2018]
- Bachelor of Science in Accounting and Finance, [Mzumbe Univeristy], [2012]
- Nanodegree in Software Engineering, [Udemy], [2023]

Technical Skills:

- Proficient in HTML, CSS, WordPress and JavaScript for web development
- Experienced in PHP, C, and Python for backend development
- Familiar with SQL and MySQL for database management
- Knowledgeable in Linux and Git for version control

Professional Experience:

- Tax Auditor, [Tanzania Revenue Authority], [March 2013 - Sept 2017]
- Investment Analyst, [University of Stirling], [Sept 2017- Sept 2019]
- Tax Consultant, [Nasuka Consultancy], [Sept 2019 – up to date]

In these roles, I gained experience in analyzing financial data, identifying trends and patterns, and making informed decisions. I also developed strong problem-solving skills and attention to detail, which I can apply to software development.

Certifications:

- [CPA(T)], [NBAA], [2015]

I am excited to apply my skills and experience to a career in software development. I am a fast learner and eager to take on new challenges in the field.

Thank you for considering my application.

Sincerely, [Richard Philemon Msule]
